

MedInsight Employer Group Reporting Solution

The MedInsight® Employer Group Reporting Solution helps employers or a health plan's employer clients accurately understand the value they receive from their benefit spend while getting a realistic comparison to other employers in their region. With preconfigured reports and easy-to-publish summary performance reports, the MedInsight Employer Group Report Solution helps you satisfy employer reporting needs easily and confidently.

Health plans that serve the employer market are experiencing greater demands from their employer clients. Employers must manage their employee health benefit spend wisely. As a result, health plans must demonstrate real value. One strategy for health plans to demonstrate such value is to provide periodic reporting packages to employer clients. These reports are the byproduct of the health plan's ability to integrate key data sources from the employer and transform this data into usable information. Employers will get a valuable insight into the key performance indicators related to their benefit spend. Generating these reporting packages is difficult for many health plans; data integration can be complex, and many health plans do not have access to the analytic methods and benchmarks that transform raw data into digestible information.

The Solution

The MedInsight Employer Group Reporting Solution is used to help health plans produce robust reporting packages tailored for employer clients. This solution allows organizations to generate reports highlighting areas such as:

Cost trends – Identify components of trend broken down into key service categories

Population characteristics – Employee distribution by age/gender, average risk score

Key metrics compared with benchmarks – Your statistics compared with Milliman benchmarks

Clinical quality measures – Employee compliance with evidence-based measures

Network utilization – Detailed savings data from using in-network providers

In turn, employers will be able to use these reports to make decisions on a variety of topics, including:

- Cost sharing
- Benefit plan design
- Care management strategies
- Employee communication and education
- Vendor management

Methodology

The Employer Group Reporting Solution leverages the MedInsight Data Warehouse (SQL Server) in combination with a number of powerful analytic components that transform raw data into key information. Key analytic methodologies and components include:

- Milliman Health Cost Guidelines Grouper
- Milliman benchmarks
- MedInsight evidence-based measures
- MedInsight Chronic Conditions Hierarchical Grouper
- Milliman Advanced Risk Adjustors
- MedInsight Health Waste Calculator

The MedInsight platform stands alone as the healthcare industry's most valuable analytic solution because of its ability to excel in all key areas that each unique market requires.

Health plans will have access to dashboards, standard reports, and ad hoc analyses through the MedInsight Portal—a highly intuitive user interface built on Microsoft SharePoint. In addition, health plans will have the option of providing MedInsight access to their designated employer clients through the MedInsight Employer Portal.

Employer Group Reporting is part of the suite of MedInsight Solutions, a collection of integrated solutions available within the MedInsight Analytic Platform. The MedInsight Analytic Platform is a robust decision-support system that leverages Milliman's leading actuarial, financial, and clinical methodologies. In working with our clients—health plans, at-risk providers/accountable care organizations, employers, state governments, third-party administrators, and community health coalitions—we are keenly aware of the different business demands of each. Because one size does not fit all, Milliman enables clients to pick only the MedInsight Solutions that are required to meet their unique demands, thus customizing their MedInsight experience by licensing only what they need.

The MedInsight Employer Group Reporting Solution assists health plans and employers in maximizing the value of their investments in employee health benefits through a combination of technology, data services, and healthcare analytics that can help:

Integrate data from multiple sources into a consolidated, tightly integrated warehouse

Analyze the effectiveness of wellness plans

Gain access to key performance indicators through easy-to-use dashboards

Review cost and utilization trends

Create executive reports for boards of directors, HR administrators, and other internal and management audiences

MedInsight integrates vital healthcare data assets into a single, comprehensive analytic environment that can accurately generate performance metrics on demand.
