

MedInsight Analytic Platform

In healthcare analytics, credibility matters.

What Sets Us Apart

Data Confidence Model

Your end goal is data you can trust.

Healthcare Analytics

Unlike our competitors, every dollar of R&D goes toward healthcare analytics.

Flexibility

By using MedInsight Tools and Solutions, you can customize our system to fit your company's needs.

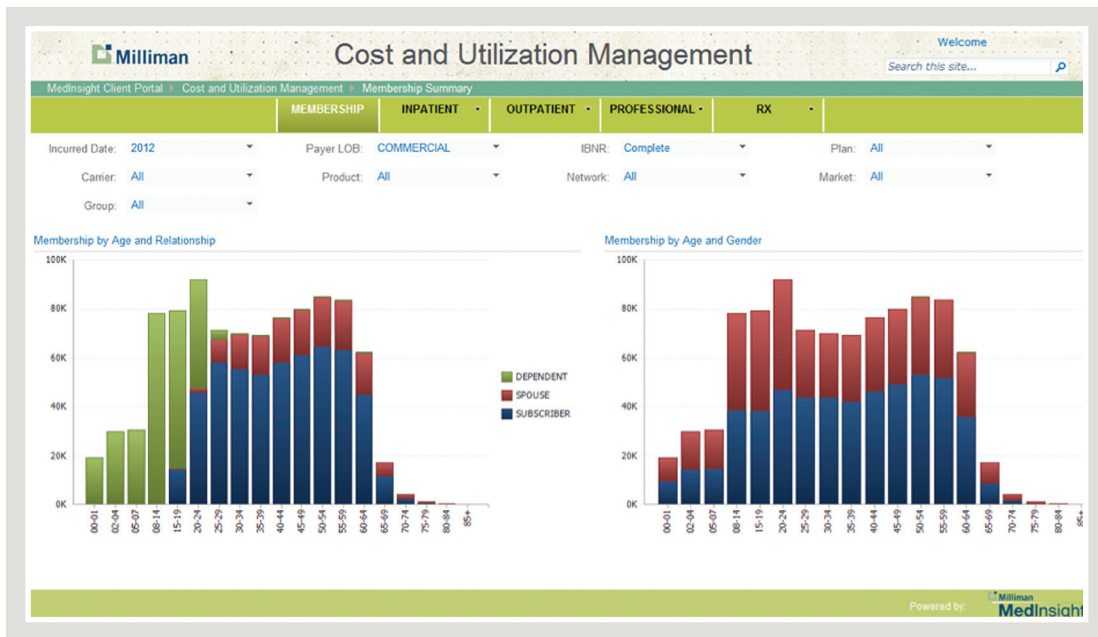

Our Hands-On Approach

Our independent culture means the client comes first.

MedInsight

Since 1997, Milliman MedInsight® has helped hundreds of healthcare entities and organizations leverage their data for business intelligence and insight into key performance metrics. Regardless of market conditions or the legislative climate, from capitation of the 1990s to the ACA and everything in between, one thing has remained a constant: Using data as a competitive advantage should be a part of your core strategy, and MedInsight can help.

ALL OF YOUR KPIS AT YOUR FINGERTIPS

Solutions

MedInsight Solutions work within the MedInsight Analytic Platform to provide a focused set of functionality, analytics, and preconfigured or custom reporting and data configurations to give users practical ways of analyzing their healthcare data.

Cost Analysis

Physician Profiling

ACO Reporting

Employer Group Reporting

Hospital Performance Comparison

All Payer Claims Database (APCD) Management

Administrative Cost Management

Care Management

Health Coalition Management

Whereas the MedInsight Analytic Platform is an end-to-end system, MedInsight Tools are the decoupled analytic components available for licensing on a standalone basis.

Tools

Benchmarks

Hospital Evaluation and Comparison System (HECS)

Guideline Analytics

Chronic Conditions Hierarchical Groups (CCHGs)

Health Waste Calculator

Milliman Advanced Risk Adjusters (MARA)

Health Cost Guidelines (HCG) Grouper

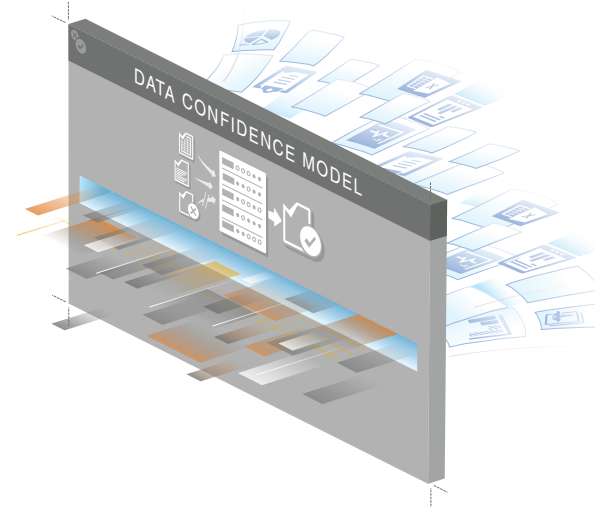

GlobalRVUs

Data Confidence Model

MedInsight's Data Confidence Model ensures that the data that goes into the system can be relied on to generate accurate results. Using our Data Confidence Model, we can integrate multiple complex databases while flagging inconsistencies and anomalies up front. The result is an analytic platform that can truly tie all the way through to your bottom line. MedInsight accomplishes this through:

- 100+ automated audits to help identify initial data quality issues during the file intake process, saving significant time
- More than 40 stringent tests that are looking for those hard-to-find issues among claims and enrollment data that might mislead users and decision makers
- A comparison of your results against industry-standard codes and benchmarks, ensuring that key business criteria are present and accurate
- Checks done by our model to ensure that business intelligence metrics are credible to use throughout an organization, including risk scores, episodes, evidence-based measures, and benchmarks
- Final checks by Milliman professionals who are trained in data-certification processes

Milliman MedInsight is one of the healthcare industry's most highly regarded platforms for data warehousing and healthcare analytics, and has been adopted by payers, purchasers, providers, and other healthcare clients. Additional MedInsight products include solutions that provide preconfigured or custom reporting and data configurations, as well as individual tools that can address specific business needs.
